Beihang University, Xueyuan Road No.37, Beijing, China | <https://angusmonroe.github.io/>

## EDUCATION

### Beihang University

Sep 2016 - Jun 2020

*Undergraduate Software Engineering*

*Beijing*

- Honors/Awards: Yuanhang Undergraduate Summer Overseas Research Scholarship, Software College 2018 Innovation and Entrepreneurship Scholarship, Software College Excellent Student Leader Award

## PUBLICATION

- Jiaxing Xu**, Zhaoyu Wang, Peiran Yao, Yutao Zhang and Jie Tang. ColdChat: Cold-Starting Task-Oriented Dialogue System with Template-Guided Pre-Training. In Proceedings of the 55th Annual Meeting of the Association of Computational Linguistics (ACL'20)(submitted).
- Jiangneng Li\*, **Jiaxing Xu\***, Cheng Long. TAS-LSTM: Predicting Sports Trajectory under Team Aware Situations. In Proceedings of the 24th Pacific-Asia Conference on Knowledge Discovery and Data Mining (PAKDD'20)(submitted).

## PROFESSIONAL EXPERIENCE

### Knowledge Engineering Group, Tsinghua University

Jun 2018 - Present

*Research Assistant, advised by Jie Tang*

*Beijing*

- Took part in AMiner dialog system NER and chatbot related work.
- Use BiLSTM-CRF-NER model and LSTM classifier to construct chatbot. An interactive visualized syntax tree help people to define question rules.

### Compute Intelligence Lab, Nanyang Technological University

Jul 2019 - Sep 2019

*Research Assistant, Advised by Yiping Ke*

*Singapore*

- Responsible for GNN+dialog system related work.
- We consider to construct a graph by using the knowledge and use GNN to learn the construction feature from the graph. Then combine the GNN output with the origin encoder to improve the dialog agent.

### Big Data Mining Team, Microsoft Research Asia

Mar 2019 - Jun 2019

*Research Assistant, advised by Börje Karlsson*

*Beijing*

- Participate in the development of intelligent assistant EDI.

### School of Software, Beihang University

Aug 2018 - Sep 2018

*Teaching Assistant of The Practice of Programming*

*Beijing*

- Responsible for the basic direct of ML and Python.
- The course is a primary school course designed to familiarize students with the engineering process and develop a complete project independently.

### Jiuyi (Beijing) Information Technology Co., Ltd.

Jun 2017 - Sep 2018

*R&D Engineer, Research and Development Department*

*Beijing*

- Leading the research and development of the "Intelligent Interrogation" internship project, mainly responsible for the training of Word2vec and LDA models.
- The project classifies the symptoms in the disease library by machine learning methods, and then recommends the corresponding medication according to the symptoms of different patients.

## LEADERSHIP EXPERIENCE

### XiaoTan Academic Dialogue System

Jan 2019 - Jun 2019

*First Author*

*Beijing*

- A dialogue system based on the AMiner data using the pipeline method to improve the performance of the model on small-

scale data and implementation cold-start

- Responsible for model design and data processing

#### **QA System Development**

*May 2018 - Jul 2018*

*First Author*

*Beijing*

- Generate answers to different questions using the Seq2seq model.
- Responsible for data processing and model training.

#### **Automatic Generation of Smart Contracts Based on Blockchain and Natural Language Processing**

*Feb 2018 - May 2018*

*First Author*

*Beijing*

- 3rd Prize of the 28th Feng Ru Cup Science and Technology Competition
- Responsible for keyword extraction and semantic analysis

#### **Intelligent Interrogation System Based on Natural Language Processing**

*Jul 2017 - May 2018*

*First Author*

*Beijing*

- 3rd Prize of the 28th Feng Ru Cup Science and Technology Competition
- Participated in the Beijing University of Aeronautics and Astronautics Innovation and Entrepreneurship Program and received 7500 yuan of research funding
- Responsible for data acquisition and model training

#### **Food QA System**

*Jun 2017 - Aug 2017*

*Second Author*

*Beijing*

- 2017 Baidu Star Developers Competition, seventh place
- Building a task-oriented gourmet question answering system using traditional pipeline methods
- Responsible for designing intents and vocabulary in UNIT

### **Community and Organizational Experience**

---

#### **Student Union of Software School**

*Jul 2017 - Jul 2019*

*Minister*

*Beijing*

- The contact agency cooperates with the company to provide financial support for various activities of the college and to cooperate with other school colleges.
- Participated in the 2017 Amethyst Ten School Ballroom
- Participated in the Microsoft Asia Academy Internship Sharing Session

#### **HP DreamWorks**

*Jun 2017 - Jul 2019*

*Campus Captain*

*Beijing*

- Hosted the "HP Campus" Campus Engineer Training Program
- Participated in HP product research twice
- Two "HP Service Day" events
